

Keep Everyone Safe by not Installing Equipment on Cooperative Poles

Due to safety concerns for our linemen and property owners, the Cooperative does not allow satellite dishes to be attached to Cooperative poles. If you are considering the installation of a satellite dish, make sure the installer knows not to mount it on a Cooperative pole. The electric lines attached to the pole cause a hazard to the installer, and the dish causes a hazard to linemen who may need to climb the pole. Cooperative linemen also do not want to damage your equipment if they need to climb the pole. Other items such as signs, antennas, birdhouses, and owner-furnished security lights are also not allowed on Cooperative poles. If you have an existing installation that needs to be removed, please contact us so that Cooperative personnel can safely remove the item. Remember to educate family members, children, and everyone else on the dangers of overhead power lines.
