

Look Up and Live!

Please “look up” before building that new building, planting that tree, erecting that antenna, flying that kite, or installing that swimming pool. Don’t create a safety hazard that may endanger you or your family and friends. If power lines are near your installation, please contact the Cooperative before you start working. Do not assume that clearances to the power lines will be sufficient to meet required safety codes. Look up and live! It could save your life.
